

REMINGTON®

HAIR TO GO! Powerful New Travel Appliances in Remington's 2x Protection - & Go Range

We're on the move more than ever before, so trust Remington to jump on the trend for travel with its new range of portable *and* powerful appliances that deliver catwalk-quality hairstyling while you're on the go.

If there's one thing today's traveller just won't stand for, it's jet-lagged hair! Remington's 2x Protection - & Go range targets modern travellers with two new products that are fashionably compact in size yet still deliver maximum styling power.

Remington's 2x Protection range is for those who want the latest styles from the fashion capitals of the world yet still want to protect their hair from potential damage, no matter how many time zones you've been through! The dryer offers a double protection package of either 'Ions and Ceramic' for healthy looking, frizz-free hair and the straightener has 'Ceramic and Teflon® Coating' for even heat distribution, smooth styles and easy glide use.

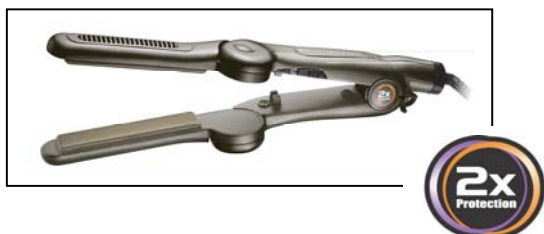

2x Protection Dry & Go (D3415)

This neat little appliance packs a powerful punch of 2000w of drying power yet still folds away into the smallest of spaces in its handy travel pouch. A convenient folding handle design means it can stow away into the smallest of hand luggage without compromising on function. Containing ion emitters that help to reduce frizz and a ceramic ring that distributes the heat evenly, Remington's 2x Protection Dry & Go (€29.99) is the perfect companion for the modern traveller. Its dual voltage function comes as standard so you can use it anywhere.

2x Protection Sleek & Go (S1009)

The craze for sleek hair continues and now there's no excuse for you to leave the trend behind, even when you're travelling. Remington's 2x Protection Sleek & Go (€34.99) is a unique folding straightener that packs away into the smallest of spaces. Yet when salon-style straightening is required, it folds out to become a full function, full size straightener. Ready to use in 90 seconds, it heats up instantly from 130-190 °C degrees to tame economy class hair into a first class cabin style! With double protection 'Ceramic and Teflon® Coating' coated plates for easy glide styling, there's no stickiness or hot spots and hair can be smoothed out safely into sleek and shiny styles. A heat protection bag also means it can be stored safely immediately after use.

Remington's Artistic Director and top salon owner Steven Goldsworthy says "The Sleek and Go is the perfect tool to take away on holiday. Not only does it fold neatly in half, taking up no space in your luggage, but it will deliver the same quality of performance you're used to from a normal sized pair of straighteners!"

You don't have to miss out on next season's trends just because you're on the move. For your nearest Remington stockist, contact (telephone number) or visit www.remington-products.com.
